

Mastertech Engineering and Masterair Services have adapted our policies and working environments since the beginning of the Covid-19 pandemic. We will continue to adhere to HSE and Government guidelines in relation to protecting the health and safety of our staff, clients, and their families.

Mastertech and Masterair will monitor and engage with all regulatory bodies to ensure our policies, procedures and protocol are in adherence with the required Health and Safety practices.

Our adaptation and application of new strategies to mitigate Covid-19 will be stringently upheld and enforced throughout our organisation and will remain in place until the HSE or Government deem it necessary to adjust or remove.

Our actions and new procedures implemented since the beginning of the pandemic and currently adopted and in place are inclusive of the below.

- ***Covid-19 Business Continuity Plan***
- ***Monitoring and updating our operational status through regular communications across all media platforms available.***
- ***Creation of a new Covid-19 specific Risk Assessment Document.***
- ***Creation and issue of Company Covid-19 Standard Operating Procedure Document.***
- ***Return to work induction for all staff.***
- ***CIF Covid-19 Induction training.***
- ***H&S Covid-19 Compliance Officer training.***
- ***Restructuring and adaptation of new office layouts, staff arrangements and Covid-19 protective screening and signage.***
- ***Provision of PPE and implementation of good hygiene practices with focus on hand washing cycles and social distancing protocol.***

We are following all HSE, Government and CIF guidelines and standard operating procedures related to the mitigation of COVID-19. Company induction, risk assessments, policies and protocol related to C19 will be communicated to all staff. All questions, queries and/or concerns should be highlighted to your Masterair/Mastertech point of contact who will escalate and communicate a time to discuss and respond.

Our priority is the safety and wellbeing of our staff, clients, and their families. All necessary precautions will be implemented to ensure a healthy and safe working environment for everyone.
